

# The world's most advanced leadership simulations

Developed by **prendo**

In the modern world, leaders are facing new and increasingly complex challenges, so they urgently need more effective learning methods.

Prendo simulation workshops, both classroom and virtual, are run for a variety of purposes, including learning and development, project planning, and team-building.

The simulations deliver a number of valuable innovations:

- They provide accelerated, risk-free experiences.
- They allow learners to see the links between their actions and the outcomes, by receiving clear and immediate feedback.
- They give teams a chance to apply a very basic principle of improving performance: the need to practise.

“Prendo has taken the concept of simulating organizations to a new level.”

—Professor Vit Henisz  
Wharton

“Prendo’s simulations provide a very valuable innovation for the way we develop leaders.”

—Stephen Carver  
Cranfield

## 3 compelling reasons to use a Prendo simulation:

### 1 Expertise

Prendo’s team has wide expertise in management topics, learning science, software coding, algorithms and modelling, and interface design.

### 2 Experience

Prendo and its clients have run thousands of simulation workshops over the last 20 years, gathering feedback from tens of thousands of participants from around the world.

### 3 Innovation

Prendo’s highly realistic virtual environments model the complex human dynamics and ambiguous nature of leadership challenges.

Prendo’s simulations are used by leading business schools and organisations around the world:

# Prendo has a portfolio of 6 simulations that each cover a different set of leadership topics and skill areas:

## PACTIO (½ to 1 day events)

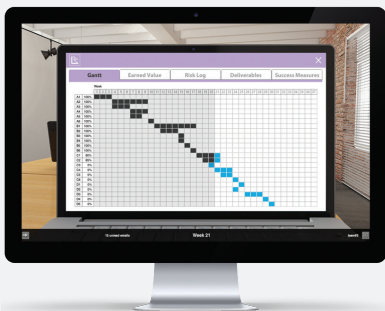

- stakeholder management
- influencing skills
- responsible leadership
- cross-cultural leadership

## MUTARI (½ to 1 day events)

- leading change
- implementing strategy
- influencing skills
- post-merger integration

## SCHOLA (1 to 2 day events)

- project planning & control
- project management essentials
- earned value management
- managing risk & uncertainty

## SPATIUM (1 day events)

- advanced project management
- managing risk & uncertainty
- implementing strategy
- stakeholder management

## KEROVKA (½ day events)

- crisis management
- managing reputation & trust
- stakeholder management
- responsible leadership

## xCHANGE (½ to 1 day events)

- leading innovation
- leading change
- influencing skills
- implementing strategy
